

SF-260 FLOWBENCH

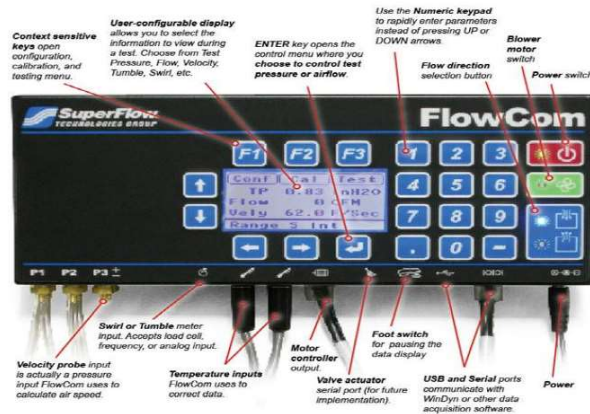

The SF-260 Flowbench is the evolution of the SF-110. Now fully digital with the FlowCom digital airflow measurement system. 260 cfm at 10" of water test pressure.

Overview

The SF-260 digital flowbench is the evolution of the SF-110, it flows 260 cfm @ 10" of water. The SF-260 comes standard with our FlowCom™ digital airflow measurement system for accurate, repeatable and fast testing. FlowCom™ ensures accurate digital airflow measurement and control by automatically measuring test pressure and temperature; then presenting corrected flow data on the easy-to-read, precision display. This saves users considerable time when compared with standard manometer type benches that require users to make calculations to achieve corrected flow numbers. The included automatic motor controller maintains constant test pressure without the use of knobs and valves and it also helps extend motor life by reducing heat generated during operation. Reduced heat means that operators can run the SF-260 for longer durations than benches lacking the motor control feature.

FlowCom Controls Overview

Product Specifications

Calibration Test	10" of water
Range	0-280 cfm
Capacity	260 cfm @ 10" of water
Power	240 VAC, 12A, single phase
Weight	100 lbs (46 kg)
Dimensions	27 x 20 x 36 in. (69 x 51 x 91 cm)

BRAND: SUPERFLOW

CONDITION: NEW

PRICE: 7500 EURO VAT EXCLUDED (IT COSTS 15.000 EURO VAT EXCL.)
